

Welcome:

Welcome to our first quarterly e-newsletter!

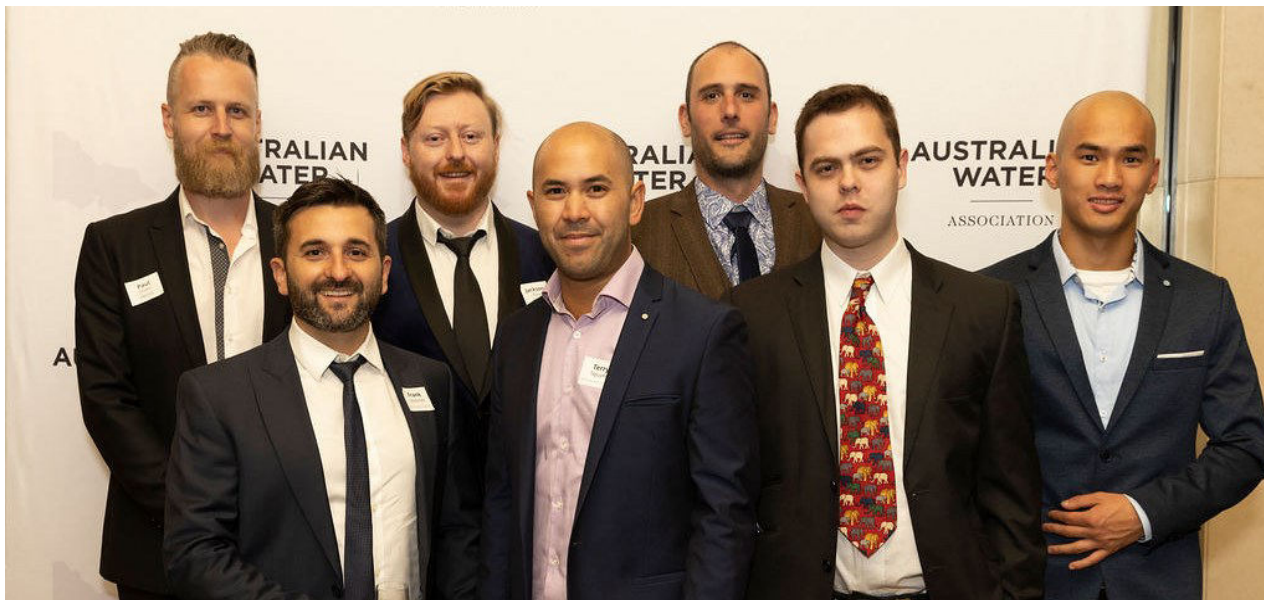

In these short news blasts we look forward to; introducing you to all the PROVE services, including our Plumbing & Water Meter Testing Laboratories and our Infrastructure Services (Mechanical & Electrical).

We will also be sharing with you; what's going on, or coming up at PROVE, projects we're excited about, causes we are passionate about, and more.

Late January saw the exciting new appointment of Derrick Sun in our Flow Meter Calibration laboratory. Derrick holds a Bachelor of Science (Physics) and in the short time since he came on board has shown a great enthusiasm towards his role.

We recently found our latest addition to our growing team of engineers in Cooper Docking. Cooper has relocated from Northern Victoria to join us and holds Bachelor of Mechanical Engineering (Honours) from Swinburne University.

AWA 58th Annual Awards Gala:

Melbourne 28th March 2022

PROVE is a proud member of the Australian Water Association, with a number of our team attending the 58th Annual Awards Gala, celebrating the resilience of our Victorian water community and the achievements of those making a difference in water.

We think they scrub up pretty nicely!

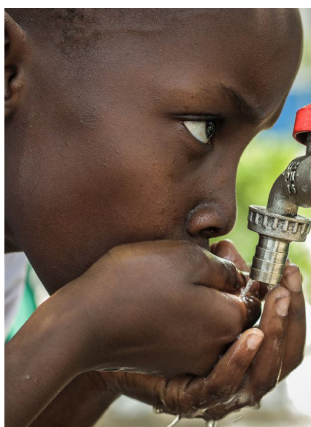

A worthy cause:

WaterAid is an international non-government organisation. It's mission is to transform lives by improving access to safe water, hygiene and sanitation in the world's poorest communities.

WaterAid works with local partners to help communities access clean water, decent toilets and good hygiene, using the experience and research to influence decision-makers to do more to provide these vital services.

PROVE acknowledges the tireless efforts of WaterAid worldwide and we are proud to have been contributing to this meaningful cause for 10+ years.

Plumbing Connection Magazine:

With 25+ years experience and reaching 20,000 subscribers with their quarterly publications Plumbing Connection is the most highly circulated independent magazine for this sector.

PROVE has been regularly contributing to the Plumbing Connection quarterly magazine writing articles since 2013, bringing our testing laboratory knowledge to assist in providing a great resource for plumbers and manufactures.

In the current issue Frank Iapozzuto covers Fusion Bonded Epoxy (FBE), eloquently walking us through the complete process of coating a ductile iron fitting with FBE, it's relevance to standard AS/NZS 4158, while also highlighting the testing conducted in our very own laboratory.

Keep an eye out for the WINTER 2022 edition.
